(NEW ENHANCED VERSION!)

*UpToDate* online via the Blackberry

## PDA requirements

The minimum requirements for installing *UpToDate* on a PDA device are as follows:

- ▶ Device running Windows Mobile 5 or Windows Mobile 6 for Pocket PC or Smartphone. The device must have an SD memory card slot.

**or**

One of the following devices running Palm OS: Palm Centro, Palm TX, Treo 650, Treo 680, Treo 700p, Treo 755p, or LifeDrive. The device must have an SD memory card slot.

- ▶ SD memory card that is compatible with your device. 2 GB free space on the card is required for a full installation (all program files, topics, graphics, and abstracts); 1 GB free space is required for a minimum installation (program files and topics only).

**Note:** You must use the SD memory card to install *UpToDate*, regardless of whether your device is equipped with internal storage.

- ▶ Windows-based PC running Windows 2000, XP, or Vista that is equipped with a DVD drive.
- ▶ Memory card reader that is compatible with your PC.

## Online access from a PDA

Your web-browsing PDA device may be able to access *UpToDate* online at <http://pda.uptodate.com> if your device supports HTML, cookies, and JavaScript. Not all devices or services are validated or supported.
